ELEGANCE PUSH 2Go

Out the door and push to go!

Leaving home in a hurry and carrying a bunch of things whilst juggling your keys on the way out? We've all been there! Luckily, the Austral Elegance Push2Go replaces the need for a key to engage privacy locking with a simple push button so you can "Push2Go" to privacy lock from the outside and never be late again.

Elegance Push2Go Features

- Conventional screen door locks often feature two stage key locking – the first stage is privacy and the second stage is deadlocking. The Elegance Push2Go replaces the need for a key to engage privacy locking with a push button so you can "Push2Go".

The door is then privacy locked (not deadlocked) from the outside. The door can be unlocked from the inside with the turn snib and unlocked from the outside with a key.
- Features the patented Push2Go functionality of exterior keyless privacy lock with interior unlocking via turnsnib
- Jemmy resistant strike plate
- Combine with multipoint kits to create a triple lock for extra strength and resistance to jemmy
- Fits into industry standard door cut outs and available in a range of powder coat finishes
- Made and designed in Australia

Make security easier for your clients, use Elegance Push2Go on your next security door.
